

Supervisor

Workshop

We currently have a vacancy for a Supervisor within the Production area of the business at our Workshop facility.

Reporting to the Production Manager the overall purpose of the role is to effectively lead and supervise a manufacturing team to ensure that they achieve production, quality and H&S targets whilst maintaining high levels of morale/motivation and fully utilising the skills and resources of the team to an optimum level.

Key tasks will include:

- Team supervision
- Ensuring work issued is carried out as efficiently as possible
- Compliance with health and safety policies
- Issuing drawings in line with production planning

The ideal candidate should have previous experience of the manufacturing of a similar product, team supervision and people management. They should also have experience of target driven production and Health and Safety processes.

Additionally applicants must have the ability to communicate at all levels and to logically work through problems and provide a step by step plan. They are also required to present progress in a concise manner both verbally and in writing.

The successful candidate will ideally have a qualification in a production related subject or proven experience of working within a similar industry.

The role will require a flexible approach to hours as occasional overtime and travel will be required to suit the job requirements.

If you believe you have the experience, knowledge and qualifications to carry out this role please forward your full CV and application letter to:
