SUBJECT: Elite 6 Exhaust Silencer Bracket Inspection

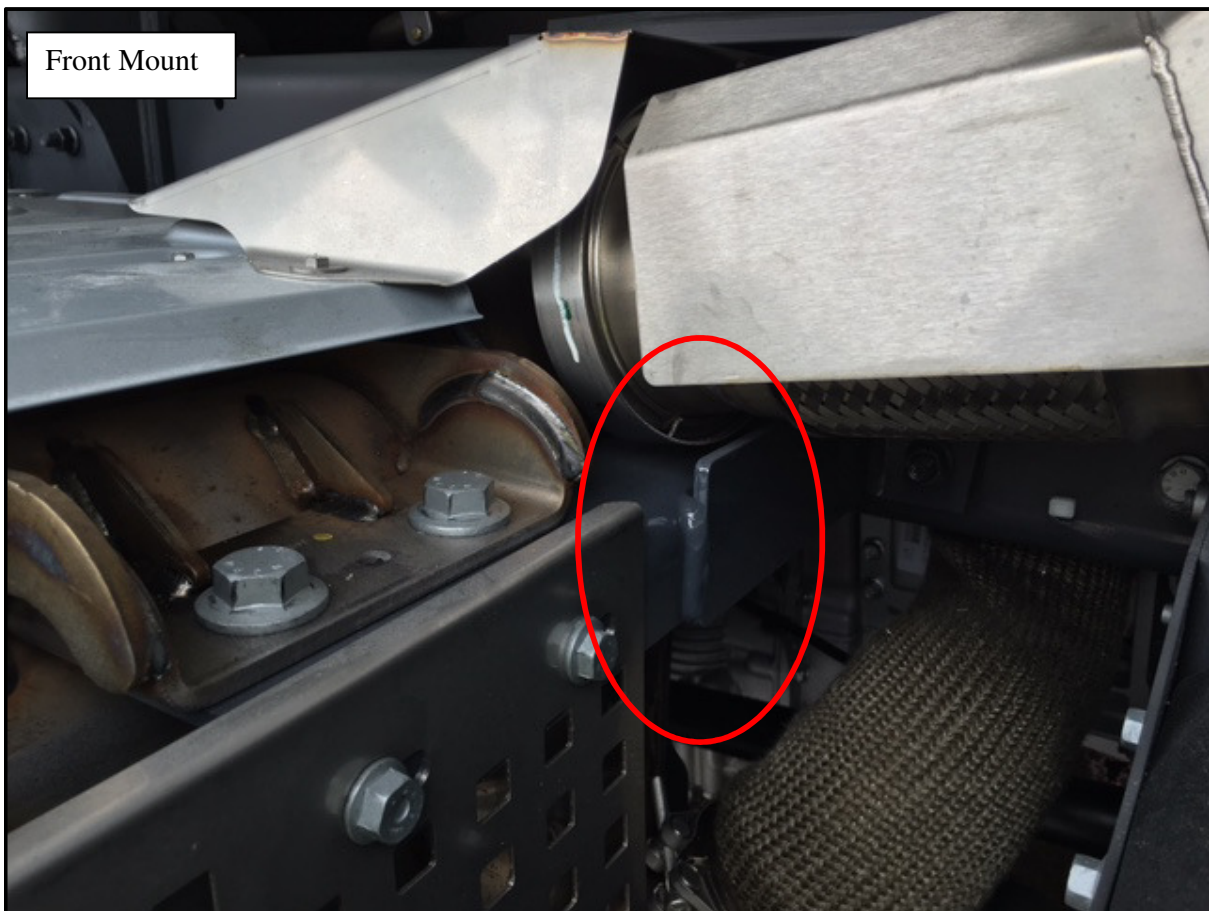

Dennis Eagle have seen a small number of cracked/broken silencer brackets on the Elite 6 chassis.

As a precautionary measure Dennis Eagle need customers to inspect all Elite 6 trucks regarding these brackets, see points of inspection marked by the red rings shown below and on the next page.

This area should be looked at as a care point on all future safety inspections of the Elite 6 truck.

During inspection if you find any occurrences of cracked/broken brackets please report to your local Dennis Eagle Service Controller.

For Export customers please contact warrantyadmin@dennis-eagle.co.uk
